Please contact the SAC with any concerns regarding substance abuse issues.

According to
SAMHSA
(<http://www.promotepr event.org>)

Talking to children about the dangers of prescription drug abuse and misuse goes a long way. Teens that had learned “a lot” or “a little” from their parents or grandparents about prescription drugs were up to 42 percent **less likely to abuse prescription drugs** than teens that reported learning “nothing.”

How to start the Conversation
